	Examiner LEE D. WILSON	Art Unit 3723	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 12-16 and 22-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wuensch (6475075) in view of Syverson (6244427).

a. Wuensch discloses a belt sander having a body element (11), a belt (35), a driven roller (19), a non-driven roller (20), a motor (16).

b. Wuensch does not disclose a motor contained within the driven roller.

c. Syverson discloses a roller which has a stator (40) and rotor (62) contained within the roller which provides an alternative means of powering the roller.

d. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the Wuensch device by replacing the motor with an alternative motor as taught by Syverson which provides an alternative means of powering the roller.

e. Wuensch discloses a claw pole motor already. Therefore the type of claw pole motor and its shape would be a matter of obvious design choice since it is known to use claw pole motor already.

3. Claims 12-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mc Curry in view of Syverson (6244427).

- f. Mc Curry discloses a belt sander having a body element (10), a belt (claim 1), a driven roller (19), a non-driven roller (20), adjustment mechanism (claim 4) and a motor (15).
- g. Mc Curry does not disclose a motor contained within the driven roller.
- h. Syverson discloses roller which has a stator (40) and rotor (62) contained within the roller which provides an alternative means of powering the a roller.
- i. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the Mc Curry device by replacing the motor with an alternative motor as taught by Syverson which provides an alternative means of powering the a roller.
- j. Mc Curry discloses a claw pole motor already. Therefore the type of claw pole motor and its shape would be a matter of obvious design choice since it is known to use claw pole motor already.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wu et al discloses an invention.
